

Global cooperation agreement with Alfa Laval

Implementation on multiple units both in Sweden and abroad

Alfa Laval, a world leading organizations in the separation, thermal and flow technology with approximately 10 000 employees around the world, after a few years of using the document management system CANEA Document in several parts of the business, has decided to expand cooperation through the global cooperation with CANEA, regarding the entire product family CANEA ONE.

All employees are able to access critical information easier and faster, including powerful search and navigation capabilities.

We originally chose CANEA Document for the implementation in Alfa Laval Lund (HQ). CANEA Document has a good graphical interface for handling processes and at the same time, you can manage documents in a good way.

Gustaf Ericsson, System manager, Alfa Laval.

For CANEA this corporate agreement with Alfa Laval, is a proof a long-term investment yields results. Daniel Sten, Business Area Manager for CANEA: "We believe in our strategy to offer demanding organizations user-friendly and cost-effective solutions. The agreement with Alfa Laval, proofs we are right."
